JULY MEETING NOTICE

**Tour of the F.E. Weymouth Water Filtration Plant,
Metropolitan Water District of Southern California**

What: The focus of the tour will be how MWD deals with the topic of Corrosion Control within the F.E. Weymouth Treatment Plant. One of the largest filtration plants in the United States, Weymouth delivers up to 520 million gallons per day. This means the plant cleans enough water to fill the Rose Bowl every 45 minutes.

The plant at La Verne in the San Gabriel Valley is one of five such filtration plants within the Metropolitan Water District system. Weymouth was the first filtration plant built by Metropolitan, and today, largely serves Los Angeles and Orange counties. Completed in 1940, it is noted for its Mission Revival style architecture and features a blue-tiled bell tower, graceful arches, a vivid district seal mosaic and colorful tiles cast with the Native American zigzag sign for water.

When: Thursday, July 24, 2008
9:45am Registration at Security Gate
10:15am Tour
12:15pm Lunch at Tenderloin Restaurant

Where: F.E. Weymouth Treatment Plant
